

# Vendor Risk Product Datasheet

The cloud has changed cybersecurity. Rapid cloud adoption is now the norm, as organizations move at the speed of digital transformation. The UpGuard platform empowers cloud-enabled organizations to proactively mitigate cybersecurity risks and securely operate in an evolving threat environment. By continuously monitoring your third and fourth-party vendors, UpGuard Vendor Risk arms your people with insights to identify, assess, and remediate third-party risks.

## What is Vendor Risk?

UpGuard Vendor Risk continuously monitors your vendors, automates security questionnaires, and reduces third and fourth-party risk.

### Monitor your vendors' security posture

Vendor Risk is a third-party risk management platform that helps you find, monitor, and assess your vendor's security posture. Track vendor performance over time, and compare them against industry benchmarks.

### Security questionnaires

Automate security questionnaires with workflows to get deeper insights into your vendors' security. Use our library of standard questionnaires or create your own custom questionnaire within the UpGuard platform.

### Use data to drive your third-party risk remediation

Use our risk dashboards to simplify and accelerate your third-party remediation process by using real-time data. We'll track your progress and tell you exactly when vendors fix issues. Using UpGuard means less email, fewer spreadsheets, and more time to focus on improving your security posture.

## At a glance

- ✓ Instantly find, monitor, and assess the security posture of your third and fourth-parties, and get a complete picture of your supply chain.
- ✓ Automate your vendor security questionnaires, reducing the noise and wasted time from endless emails and spreadsheets.
- ✓ Accelerate your third-party remediation process using in-built workflows to stay on top of emerging risks.

“If a vendor score drops below 600, we know there is a security issue with that vendor and we work with them to remediate that.”

**Jim Hart**

CISO, Pollinate

# Key features and benefits

- Executive reporting**

Create up-to-date reports on your vendors' security to identify which vendors pose the highest risk and understand issues across your vendor ecosystem.
- On-demand security ratings**

Instantly understand any vendors' security posture with our data-driven, objective, and dynamic security ratings.
- Security questionnaires**

Automate security questionnaires with workflows to get deeper insights into your vendors' security. Use our library of standard questionnaires or create your own custom questionnaire within the UpGuard platform.
- Industry benchmarking**

Compare your vendor's security posture against their industry peers to help you decide whether to mitigate or stop using high-risk vendors
- Fourth-party risk exposure**

Automatically find your vendors' vendors and understand the risks of your fourth-party vendors.
- Vulnerability detection, assessment, and management**

Discover vulnerabilities that may be exploitable in the software that is running on your vendor's websites.

We're processing over 800 billion data points each day and are directly responsible for securing over 1.9 billion records.

UpGuard is a cybersecurity platform that helps global companies prevent data breaches, monitor third-party vendors, and improve their security posture. Through proprietary security ratings, world class data leak detection capabilities and powerful remediation workflows, we proactively identify security exposures for companies.
