

# CLOUD SECURITY SERVICES

Enhance the security posture of multi-cloud infrastructure and platforms

## SECURE YOUR CLOUD FROM ADVANCED THREATS AND EXPLOITS

Cloud infrastructure and platforms play an important role in accelerating the digital transformation of a company's business processes and user experiences. Securing the workloads that enable those processes and experiences is equally important and is the joint responsibility of both the cloud service provider and the business that is consuming the cloud resources.

Adversaries are looking to take advantage of those that lack the awareness of their responsibility and are seeking to exploit any ineffective cloud security settings and take advantage of common misconfigurations like:

- Improper public-access-configured and exposed access keys
- Excessive account permissions and ineffective identity architecture
- Disabled logging, missing alerts and inadequate network segmentation
- Public snapshots and images, and open databases and caches

CrowdStrike Cloud Security Services helps you prepare for advanced attacks on your cloud resources, respond to a breach in your cloud environment and enhance the security posture of your cloud infrastructure and platforms. These services bring deep cloud security expertise that comes from building and securing the cloud-native CrowdStrike Falcon® platform, combined with the extensive threat intelligence that CrowdStrike incident responders use to understand the latest tactics, techniques and tradecraft used by adversaries to exploit cloud environments.

## KEY BENEFITS

---

**Avoid cloud misconfigurations:**  
Understand and remediate cloud security misconfigurations that could be exploited by adversaries

---

**Identify cloud attacks:**  
Determine if there is current (or past) adversary activity within your cloud environment

---

**Test cloud defenses:**  
Conduct penetration tests of your cloud infrastructure, platforms and defenses

---

**Stop cloud breaches:**  
Stop targeted attacks and recover your cloud environment with speed and precision

## KEY SERVICE FEATURES

As a leading provider of endpoint and cloud workload protection technology, CrowdStrike delivers a full range of cloud security services that leverage that technology to help you prepare for an advanced attack on your cloud, stop a breach in your cloud environment and enhance the security posture of your cloud infrastructure and platforms.

### RESPOND TO A BREACH IN YOUR CLOUD ENVIRONMENT

- **Incident response for cloud:** Handle critical security incidents and conduct comprehensive forensic analysis to resolve immediate cyberattacks in your cloud environment.
- **Cloud compromise assessment:** Identify any ongoing or past attacker activity in your cloud environment and remove any active threats from your network.

### PREPARE FOR AN ADVANCED ATTACK ON YOUR CLOUD RESOURCES

- **Red team/blue team exercise for cloud:** Prepare your cybersecurity team and learn from experts as CrowdStrike's red team attacks and its blue team helps your team defend against a targeted attack on your cloud environment.
- **Cloud penetration testing:** Simulate real-world attacks on different components of your cloud infrastructure and cloud platforms to test the detection and response capabilities of your people, processes and technology, and identify vulnerabilities in your cloud environment.

### ENHANCE THE SECURITY POSTURE OF YOUR CLOUD PLATFORMS

- **Cloud security assessment:** Leveraging the Falcon Horizon platform, gain actionable insights into ineffective cloud settings, cloud security misconfigurations and deviations from recommended cloud security architecture to help you prevent cloud breaches.

## ABOUT CROWDSTRIKE SERVICES

CrowdStrike Services equips organizations with the protection and expertise they need to defend against and respond to security incidents. Leveraging the cloud-delivered CrowdStrike Falcon® platform — including next-generation endpoint protection, cyber threat intelligence gathering and reporting operations, and a 24/7 proactive threat hunting team — the CrowdStrike Services team helps customers identify, track and block attackers in real time. This unique approach allows CrowdStrike to stop unauthorized access faster and prevent further breaches. CrowdStrike also offers proactive services so organizations can improve their ability to anticipate threats, prepare their networks and ultimately stop breaches.

## WHY CHOOSE CROWDSTRIKE?

**CrowdStrike Security Cloud:** CrowdStrike has built its business around our secure cloud-native Falcon platform. Cloud security is critical to our business as we run one of the largest scale cloud-native security platforms with more than 15Pb of security telemetry data and ingesting over 7 trillion security events per week.

**Deep cloud security expertise:** CrowdStrike has more than a decade of experience securing the cloud-native Falcon platform. This platform enables the CrowdStrike mission of stopping breaches by ultimately securing the endpoints and cloud workloads for thousands of customers across the globe.

**Comprehensive indicators of misconfiguration:** The CrowdStrike Falcon Horizon™ module uses indicators of misconfiguration (IOMs) to detect ineffective cloud security settings and misconfigurations within dynamic cloud environments before they can be exploited by adversaries.

**Extensive Cloud Threat Intelligence:** CrowdStrike incident responders use the extensive threat intelligence in the Falcon platform. This visibility provides us detailed knowledge of threat actors and the tactics, techniques and tradecraft they use to exploit cloud environments.
