

SentinelOne Endpoint Security

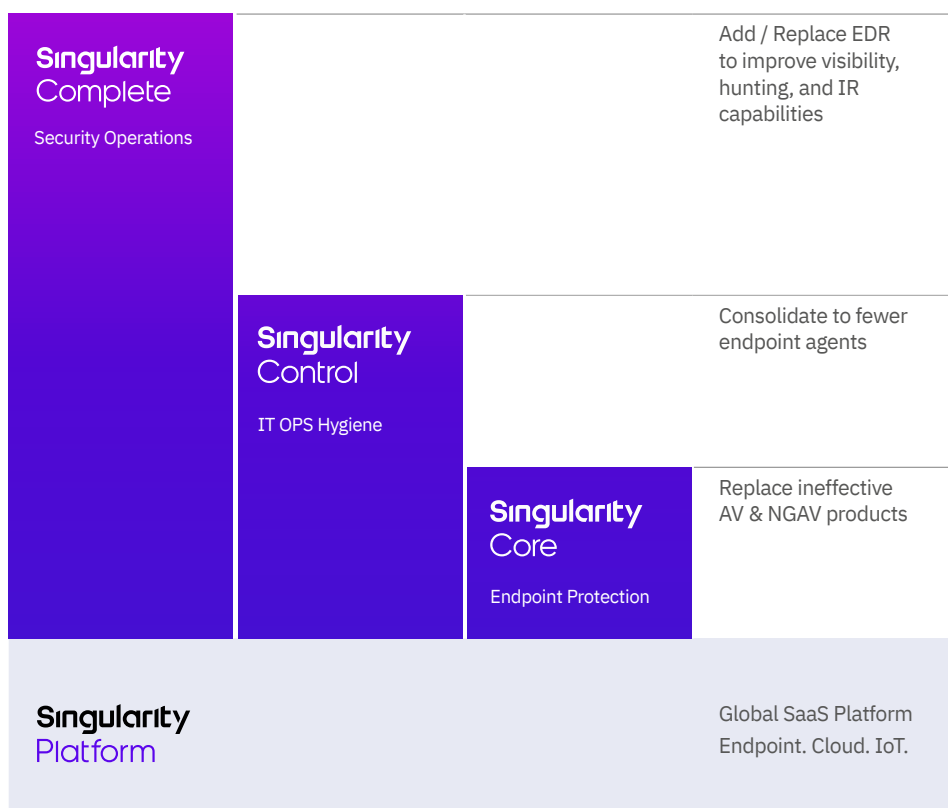

Singularity™ Platform Product Packages

The SentinelOne Singularity Platform empowers SOC & IT Operations Teams with a more efficient way to protect information assets against today's sophisticated threats.

Singularity delivers differentiated endpoint protection, endpoint detection and response, IoT security, cloud security, and IT operations capabilities - consolidating multiple existing technologies into one solution. We offer resource-efficient autonomous Sentinel agents for Windows, Mac, Linux, and Kubernetes and support a variety of form factors including physical, virtual, VDI, customer data centers, hybrid data centers, and cloud service providers.

Sentinels are managed via our globally-available multi-tenant SaaS designed for ease of use and flexible management that meets your requirements. Our Vigilance Managed Detection & Response (MDR) services subscription is available to back your security organization 24x7.

This datasheet describes our tiered product offerings known as Singularity Core, Control, and Complete. Each product package builds on the one below it.

WHY CHOOSE SENTINELONE?

- We do endpoint security and we do it well. SentinelOne truly converges EPP+EDR so that you can eliminate redundant endpoint agents and lower OPEX.
- 97% customer support satisfaction
- 97% of customers recommend SentinelOne
- Customizable console with time saving workflows
- Ransomware solved through superior behavioral AI
- Autonomous protective responses trigger instantly
- Time saving, fatigue-reducing Storyline™ with ActiveEDR® designed for incident responders and threat hunters
- Affordable EDR data retention of 365 days+ for full historical analysis
- Easy XDR integrations to other vendors

Singularity Platform Features & Offerings

All SentinelOne customers have access to these SaaS management console features:

- ✓ Global SaaS implementation. Highly available. Choice of locality (US, EU, APAC).
- ✓ Flexible administrative authentication and authorization: SSO, MFA, RBAC
- ✓ Administration customizable to match your organizational structure
- ✓ 365 days threat incident history
- ✓ Integrated SentinelOne Threat Intelligence and MITRE ATT&CK Threat Indicators
- ✓ Data-driven dashboard security analytics
- ✓ Configurable notifications by email and syslog
- ✓ Singularity Marketplace ecosystem of bite-sized, 1-click apps
- ✓ Single API with 340+ functions

Singularity[™] Core

Core is the bedrock of all SentinelOne endpoint security offerings. It is our entry-level endpoint security product for organizations that want to replace legacy AV or NGAV with an EPP that is more effective and easy to manage. Core also offers basic EDR functions demonstrating the true merging of EPP+EDR capabilities. Threat Intelligence is part of our standard offering and integrated through our AI functions and SentinelOne Cloud. Singularity Core features include:

- **Built-in Static AI and Behavioral AI analysis** prevent and detect a wide range of attacks in real time before they cause damage. Core protects against known and unknown malware, Trojans, hacking tools, ransomware, memory exploits, script misuse, bad macros, and more.
- **Sentinels are autonomous** which means they apply prevention and detection technology with or without cloud connectivity and will trigger protective responses in real time.
- **Recovery is fast** and gets users back and working in minutes without re-imaging and without writing scripts. Any unauthorized changes that occur during an attack can be reversed with 1-Click Remediation and 1-Click Rollback for Windows.
- **Secure SaaS management access.** Choose from US, EU, APAC localities. Data-driven dashboards, policy management by site and group, incident analysis with MITRE ATT&CK integration, and more.

Singularity[™] Control

Control is made for organizations seeking the best-of-breed security found in Singularity Core with the addition of “security suite” features for endpoint management. Control includes **all Core features plus:**

- **Firewall Control** for control of network connectivity to and from devices including location awareness
- **Device Control** for control of USB devices and Bluetooth/BLE peripherals
- **Rogue visibility** to uncover devices on the network that need Sentinel agent protection
- **Vulnerability Management**, in addition to Application Inventory, for insight into 3rd party apps that have known vulnerabilities mapped to the MITRE CVE database

SENTINELONE STOPS RANSOMWARE AND OTHER FILELESS ATTACKS WITH BEHAVIORAL AI AND STRONG AUTOMATIC REMEDIATION FUNCTIONS

Singularity[™] Complete

Complete is made for enterprises that need modern endpoint protection and control plus advanced EDR features that we call ActiveEDR[®]. Complete also has patented Storyline[™] tech that automatically contextualizes all OS process relationships [even across reboots] every second of every day and stores them for your future investigations. Storyline[™] saves analysts from tedious event correlation tasks and gets them to the root cause fast. Singularity Complete is designed to lighten the load on security administrators, SOC analysts, threat hunters, and incident responders by automatically correlating telemetry and mapping it into the MITRE ATT&CK[®] framework. The most discerning global enterprises run Singularity Complete for their unyielding cybersecurity demands. Complete includes all Core and Control features **plus**:

- **Patented Storyline[™]** for fast RCA and easy pivots
- **Integrated ActiveEDR[®] visibility** to both benign and malicious data
- **Data retention options to suit every need**, from 14 to 365+ days
- **Hunt by MITRE ATT&CK[®] Technique**
- **Mark benign Storylines as threats** for enforcement by the EPP functions
- Custom detections and automated hunting rules with **Storyline Active Response (STAR[™])**
- Timelines, remote shell, file fetch, sandbox integrations, and more

Impressive capabilities. Easy to deploy and use EDR.

Director of Cybersecurity - Healthcare
1B - 3B USD

Single platform the SOC can rely on.

Security & Risk Management - Finance
50M - 250M USD

Increased efficiency. We've absolutely seen an ROI.

Global InfoSec Director - Manufacturing
10B - 25B USD

Vigilance MDR Services Subscription

SentinelOne Vigilance Managed Detection & Response (MDR) is a service subscription designed to augment customer security organizations. Vigilance MDR adds value by ensuring that every threat is reviewed, acted upon, documented, and escalated as needed. In most cases we interpret and resolve threats in about 20 minutes and only contact you for urgent matters. Vigilance MDR empowers customers to focus only on the incidents that matter making it the perfect endpoint add-on solution for overstretched IT/SOC Teams.

SentinelOne Readiness Services Subscription

SentinelOne Readiness is an advisory subscription service designed to guide your Team before, during, and after product installation with a structured methodology that gets you up and running fast and keeps your installation healthy over time. Readiness customers are guided through deployment best practices, provided periodic agent upgrade assistance, and receive quarterly ONEscore[™] health check-ups to ensure your SentinelOne estate is optimized.

OS SUPPORT

SentinelOne supports a wide variety of Windows, Mac and Linux distributions as well as virtualization OSes. Common software exceptions are documented in our support portal.

Windows Sentinel agent

All Windows workstation starting with 7 SP1 through Windows 10
All Windows Server starting with 2008 R2 SP1 through Server/Core 2019

Mac Sentinel agent

macOS Big Sur, Catalina, Mojave

Linux Sentinel agent

Ubuntu, Redhat (RHEL), CentOS, Oracle, Amazon AMI, SUSE Linux Enterprise Server, Fedora, Debian, Virtuozzo, Scientific Linux

Windows Legacy agent

XP, Server 2003 & 2008, POS2009

Supported Container Platforms

Self-managed and Managed Kubernetes Services (EKS, AKS, GKE), OpenShift

Virtualization & VDI

Citrix XenApp, Citrix XenDesktop, Oracle VirtualBox, VMware vSphere, VMware Workstation, VMware Fusion, VMware Horizon, Microsoft Hyper-V

About SentinelOne

More Capability. Less Complexity. SentinelOne is pioneering the future of cybersecurity with autonomous, distributed endpoint intelligence aimed at simplifying the security stack without forgoing enterprise capabilities. Our technology is designed to scale people with automation and frictionless threat resolution. Are you ready?
